- Amstrad Plus computers
- Certain Amstrad CPC emulators
(subject to preliminary tests)

orion.cpcscene.com

Engine failure... A hyperspace voyage that ends in an asteroid field... Forced to eject, you wander aimlessly in space, until you detect a signal from the Orion Prime.

However, you quickly realise that this gigantic vessel is no longer the jewel of the scientific research fleet that it once was, as you discover that the crew has been decimated by a strange illness.

You must escape as quickly as possible, but to do this, you will have to explore the Orion Prime, understand what has happened on board the vessel, and perhaps even confront it...

An extraordinary game!

- 1 hour of music
- More than 3 minutes of cinematic sequences
- Ultra-fast musical disc loader
- 3-channel, 18kHz digitised music
- 4 mini-games
- Full-screen images displayed in 125 colours
- Interactive music
- Graphics generated in 3D
